

LABVIEW EXPERTISE

Lexcom Consultants Ltd is an engineering software consultancy specialising in National Instruments™ LabVIEW, offering software contractor services and complete automation solutions.

All of our consultants are formally certified LabVIEW professionals at Certified LabVIEW Architect and Certified LabVIEW Developer levels, while also being able to offer specialist skills including expert ATE design, process control, measurement, industrial automation, machine vision systems, applied image processing, motion control, and cybernetics.

Discuss your application of interest or LabVIEW project requirements.

TEST & MEASUREMENT

We regularly develop industrial as well as scientific test & measurement solutions, which can include custom instruments and/or sensor fusions, among others. Our portfolio and established application-specific expertise includes:

- Measurement & instrumentation
- Automated test equipment for many industries
- Integrated testing for high volume manufacturing
- Vision systems & automated optical inspection
- Bespoke systems on standard & custom platforms
- Optional remote LabVIEW development & support

Get in touch with us for a quote or to arrange an on-site visit.

CAPABILITY OVERVIEW

As your business partner, we can offer the following:

- Expert LabVIEW consultancy & solutions
- LabVIEW software design & development
- Certified LabVIEW Architects
- Certified LabVIEW Developers
- Official NI Alliance Partner Advantages
- LabVIEW contracting experience since 2003
- Capacity to deliver complete turnkey solutions
- Engineering expertise in several fields
- Highly flexible project delivery options
- Competitive rates & project pricing

Email or call us to find out if your business can use our expertise.

MACHINE VISION & OPTICAL INSPECTION

Automated test & measurement solutions are among our core strengths & most common type of work. We also develop applied image processing software and corresponding vision systems to improve quality, productivity, measurement accuracy, or consistency.

INDUSTRIAL & SCIENTIFIC AUTOMATION

Our industrial & scientific automation capability includes application solutions ranging from simple instrumentation to multi-DoF manipulator and / or motion control systems utilising our kinematics and control engineering expertise.

BESPOKE SOLUTIONS & TURNKEY SYSTEMS

From micro-machined tools and custom instruments to high volume manufacturing automation solutions, we can deliver systems of almost any size. This can include fully automated solutions carefully designed and implemented to client specification.

DIRECT BUSINESS STRATEGY & APPROACH

We always liaise with our clients directly. Our direct business strategy allows us to offer our services without interference from third parties, and with the openness and confidence our clients welcome in the UK and abroad.
